

Lemma Systems builds and sustains the software layer federal programs depend on – custom applications, data integration, and cloud infrastructure delivered by small senior teams, in working increments, with the documentation to hand it over.

CORE COMPETENCIES

- Application Development & Modernization

Custom software in .NET, Java, and Python; decomposition of legacy monoliths into services without taking the system offline.

■ Cloud Migration & Infrastructure

AWS and Azure migration, infrastructure as code, and repeatable environment builds inside an accredited boundary.

■ Data Engineering & Integration

ETL and streaming pipelines, API-first integration across systems of record that were never designed to talk.
- DevSecOps & Continuous ATO

CI/CD pipelines with automated STIG and dependency scanning, signed artifacts, and evidence generated as a build output.

■ Application Security

SAST and DAST integration, dependency and supply-chain review, and remediation carried through to closure.

■ Operations & Sustainment

SLA-backed maintenance, incident response, and the unglamorous work of keeping a delivered system healthy.

DIFFERENTIATORS

- 01 Senior teams, no pyramid.

The people who scope the work write the code. We do not staff a contract with juniors behind a thin layer of principals.
- 02 Working software every two weeks.

Progress is demonstrated in a running system, not a status deck – which makes scope problems visible while they are still cheap.
- 03 Handover is a deliverable.

Runbooks, architecture decision records, and environment builds ship with the code, so the government is never locked to us by undocumented knowledge.
- 04 Add one differentiator only you can claim – a cleared team, a niche accreditation, a specific system you already know.

PAST PERFORMANCE

CLIENT	SCOPE	PERIOD	VALUE
Client or agency	One line on what you built and the outcome it produced.	2024–25	\$000K
Client or agency	One line on what you built and the outcome it produced.	2023–24	\$000K
Client or agency	One line on what you built and the outcome it produced.	2023	\$000K

COMPANY DATA

UEI	K84HRCTGFJE1
CAGE	9RS82
SAM	Active thru MM/YYYY
BUSINESS SIZE	Small business
